## **DETAILED ACTION**

### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. The application has been amended as follows:

a. In the Abstract:

i. The Abstract has been replaced by:

-- The present invention provides a method for guiding a pick-up head to follow an information track. The method comprises the steps of sensing and sending notification of displacement between the pick-up head and the center of the information track, generating a first correction directly proportional to the displacement, generating from the first correction a second correction non-proportional to the displacement, generating a third correction from an amplified tracking error signal and generating a driving force proportional to the sum of the second and third corrections, driving the pick-up head to follow the information track.--

*Allowable Subject Matter*

3. Claims 1-15 are allowed.
4. The following is an examiner's statement of reasons for allowance:

The prior art teaches a tracking servo system for guiding a pick-up head to follow an information track, comprising a first means for sensing and sending a notice of displacement between the pick-up head and the center of the information track; a second means for receiving the displacement notice and sending a first correction proportionate to the displacement; a third means for receiving the first correction to generate a second correction disproportionate to the displacement.

Applicant's claimed invention is deemed allowable over the prior art of record as the prior art fails to teach or suggest either alone or in combination a fourth means for receiving **the second and a third correction**, the third correction being generated from an amplified tracking error signal and **producing a driving force proportionate to the sum of the second corrections and the third correction** for driving the pick-up head to follow the information track.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
